

Name: _____

Grade: III

Branch: _____

Date : 22/04/20

Subject: Science

Topic: Materials That We Use

All things are made of materials. They are classified into two types:

1. Natural material: *Stone, clay and metals*

2. Man-made materials: *Plastic, paper and glass.*

Things made of Stone: *Stone is a hard and heavy material. It is used to build houses, bridges and dams. Statues can also be made of stone.*

Things made of Wood : *Doors, windows, furniture, ships and some toys are made of wood.*

Things made of Metals: *Vessels, coins, motor vehicles such as cars, buses, scooters and jewellery are made of metals. Iron, copper, aluminium, brass, gold and silver are some of the most commonly used metals.*

Things made of Clay: *Flower pots and porcelain crockery are made of clay. Wet clay is sticky and elastic. It gets hard when dry. Potters use wet clay to make many things.*

Things made of cloth : *Cloth is used to make clothes, bags and covers. Cloth is made by weaving thread. Cotton, wool, silk and jute are materials used for weaving cloth.*

Things made of Plastic and Glass: *Plastic is a man-made material. Different kinds of plastics are made in factories.*

Glass is another material that is made in factories. Bulbs, glasses, and window panes are made of glass.
