

BASIC WORKSHEET- 3

Grade- VIII

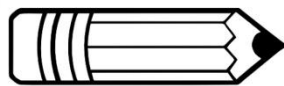

Name of the Student: _____ Grade/Sec: _____ Branch _____

MATHS

1. A solid shape bounded by a polygon is called _____
2. Lateral faces of the prism are _____
3. The straight line joining the centers of base of prism is called of prism _____
4. Polyhedron with regular polygonal faces is called _____
5. Euler's formula is _____
6. Differentiate pyramid and prism mention two examples to each
7. Verify Euler's formula to given polyhedron

8. Draw all possible nets of cube
9. Draw front view top view and side view of following objects

10. Write at least five examples each for prism and pyramid from day to day life
