**II. CREATIVE WRITING:**

Holiday is a day when a person is given a day off from his /her work and also it is break from the busy schedule. Everyone likes this period. Few people like to spend with family, few with friends.

As a student for me holiday means suspension of classes. Holidays are the best part, it offers a number of the other aspects to cherish throughout lives. Summer vacation brings along with it ample of opportunities to enjoy, relax and have fun. This summer I plan to engage myself in activities that will relax my mind and body .I need to have the energy to make the most out of all that free time. I believe regular exercise increases energy levels. Along with this, reading can

make me expert in all the fields and next meditation for 10 minutes, extremely good for me. The present situation is not so good to visit outdoors. I am planning to enjoy at home with family. In a week seven days are there similarly I planned seven different timetables. On **Monday - Me and Dad**. Playing with dad all his childhood games and learning one moral story, On **Tuesday- Me and Mom**. Helping mom in chores and sharing the moral story with mom. On **Wednesday –Unique no panic**. Spending the time with sibling or watching mythological movie, On **Thursday- Meeting a role of a teacher**. Taking classes, giving home task, and evaluating the home task. On **Friday -Art, craft and draft**, on this day we shall draw pictures and giving ratings for the best drawing and trying to make an objects with old things. On Saturday- **Go green and Stay green** I shall sow some seeds and learn more about plants, telephonic conversation with grandparents, relatives and cousins. On **Sunday- Spic and span**. Cleanliness is the one it should be followed by every individual to enhance their standard of life. So, I would prefer to clean and organize my room, bookshelf and games object.

Eventually I wish I am going to have methodological routine.
