

I. Solve the sums.

1. There are 45 boys and 32 girls in a school. Find the total number of students in the school?

T	O
4	5
3	2
7	7

There are **77** students in the school.

2. Shanthi baked 15 cookies and Raju baked 34 cookies. How many cookies did they bake in all?

T	O
1	5
3	4
4	9

Total no. of cookies baked are **49**

3. Ram has 17 chocolates and sita has 31 chocolates. How many chocolates are there in all?

T	O
1	7
3	1
4	8

There are **48** chocolates in all.

4. There are 55 juice packets 44 packs distributed among children. How many packs left?

T	O
5	5
- 4	4
1	1

Total No. of juice packets left **11**

5. In a class of a 56 students, 23 are girls. How many boys are there in the class?

T	O
5	6
- 2	3
3	3

No. of boys in the class are **33**

II. Complete the skip counting by 2s, 5s and 10s.

2s	2	4	6	8	10	12	14	16	18	20
5s	5	10	15	20	25	30	35	40	45	50
10s	10	20	30	40	50	60	70	80	90	100

III. Complete the repeated addition and multiplication sentence.

A duck has 2 legs.

a) How many legs do 2 ducks have?

$$\underline{2} + \underline{2} = \underline{4}$$

$$\underline{2} \times \underline{2} = \underline{4}$$

b) How many legs do 3 ducks have?

$$\underline{2} + \underline{2} + \underline{2} = \underline{6}$$

$$\underline{2} \times \underline{3} = \underline{6}$$

c) How many legs do 4 ducks have?

$$\underline{2} + \underline{2} + \underline{2} + \underline{2} = \underline{8}$$

$$\underline{2} \times \underline{4} = \underline{8}$$

d) How many legs do 5 ducks have?

$$\underline{2} + \underline{2} + \underline{2} + \underline{2} + \underline{2} = \underline{10}$$

$$\underline{2} \times \underline{5} = \underline{10}$$

e) How many legs do 6 ducks have?

$$\underline{2} + \underline{2} + \underline{2} + \underline{2} + \underline{2} + \underline{2} = \underline{12}$$

$$\underline{2} \times \underline{6} = \underline{12}$$
