

Name: \_\_\_\_\_ Grade: III Branch: \_\_\_\_\_ Date: 28/04/20

## Subject: Science Key

### TOPIC: Air, Water and Weather

**Q.1.** Changes in the weather are caused by sun, wind and water vapour.

**Q.2.** Storms are winds accompanied by lightning and thunder.

**Q.3. Circle the correct answer:**

Water is very important for life on \_\_\_\_\_

Earth Moon Sky

**Q.4.** Name three things that air contains:

A. Germs , dust particles, gases

---

**Q.5. Give one word for the following:**

a. I am a gentle wind breeze

b. When I become too heavy with water drops , I release them as rain clouds

c. I am the one who heats up water from rivers , lakes , ponds etc. sun

**Q.6.** When Suresh blew air into a balloon it expanded. This shows that

\_\_\_\_\_

a. air has no mass b. air fills space. c. air has no weight d. air is visible.

**Q.7. Circle the correct answer:**

Germs present in tap water can be killed by

Filtration                      condensation                      boiling                      decantation

**Q.8. What does ' X ' represent in the box given below?**

**Q.9. Match the following:**

- |                             |                                       |
|-----------------------------|---------------------------------------|
| (i) Moving air              | (a) smoke , dust , germs              |
| (ii) The heat of the sun    | (b) water vapour                      |
| (iii) A weather cock        | (c) shows the way the wind blows      |
| (iv) Air contains           | (d) big ball of fire                  |
| (v) We should not           | (e) solid , liquid and gas            |
| (vi) The sun is a           | (f) changes water into water vapour   |
| (vii) A wind vane helps     | (g) water from rain                   |
| (viii) Three forms of water | (h) waste water                       |
| (ix) Air has                | (i) is called wind                    |
| (x) Rainwater               | (j) to find out the direction of wind |

**Ans. (i) is called wind**

(f) changes water into water vapour

(j) to find out the direction of wind

(a) smoke , dust , germs

(h) waste water

(d) big ball of fire

(c) shows the way the wind blows

(e) solid , liquid and gas

(b) water vapour

(g) water from rain
